10. Install Give Way signage (facing path users) each side of Sanoni Ave crossing.

11. Widen 143m of existing narrow path immediately north of Ida Ave (from 1.7m to 2.5m). Widening will involve relocating existing kerbing and rebuilding the existing path underneath the kerbing.

9. Install trail directional markers every 400 - 500 metres, and at each path junction or changes of direction. In most cases, these will be straight ahead arrows on both sides of marker post facing trail users.

12. Develop trailhead facilities at Scott Park (trailhead sign/map).
